Fast Growing Technology Firm Opening Branch Office in Oklahoma

Newcastle, OK (March 24th, 2020) Optimized Computer Solutions, (<https://www.ocsolutions.co/>), a leading nationwide managed IT service provider for healthcare and other industries, opened a new office in Newcastle (708 S. Main Street, Suite B) this month. This new location allows OCS to expand its operations and establish a substantial local presence focused on offering its expertise to Oklahoma businesses. For over a decade, OCS has been providing consistent, customer-oriented IT managed services. OCS's ability to implement, protect, diagnose, resolve, and maintain IT infrastructure that aligns with each individual business is the "secret sauce" to their continued success.

"The decision to expand our presence into Oklahoma was a logical step in our business growth strategy," said Woodward native Joe Goldstein, president and founder of OCS. "Oklahoma's consistent economy coupled with strong healthcare businesses and overall diverse market landscape will open the doors to establishing new relationships and leverage existing ones," stated longtime resident and VP of Sales & Engineering, Brett Deemer of Blanchard.

OCS's ability to seamlessly integrate our management tools into an existing environment enables them to quickly resolve issues and answer questions without stepping a foot inside a client's door. Even though OCS excels at remote support, they are now looking forward to meeting with business leaders in Oklahoma to provide a hybrid solution of remote and in-person interaction that will address all the client's technology issues. The OCS management team has over 60+ of diverse IT experience ranging from CIO, Information Security Management, HIPAA, engineering, infrastructure, and business continuity.
